

An Anthropocene Primer

For over two decades now, the concept of the Anthropocene has been developed as a framework for understanding environmental change that highlights human impact on earth systems. An important contribution to this scholarly endeavor has been [An Anthropocene Primer](#) edited by Jason M. Kelly and Fiona P. McDonald. This primer is an innovative open access, open peer review publication that guides learners through the complex concepts and debates related to the Anthropocene.

Dr. Ananya Ghoshal, Assistant Professor of English, IIT Indore has co-authored [An Anthropocene Primer](#). This work emerged from the [“Anthropology of the Anthropocene: Structures, Theories, Practices”](#) workshop hosted by the IUPUI Arts and Humanities Institute, Indianapolis which Dr. Ghoshal was a part of. The goal of this workshop was to explore interdisciplinary questions about Anthropology’s role in the Anthropocene. Version 1.0 of [An Anthropocene Primer](#) has been available for open peer review from October 23, 2017, through February 1, 2018. Since it went live, the platform has received more than 3,500 unique visitors. This open peer review allowed users to contribute to and engage with fellow readers and the authors. The editors are now developing it for a final print and open access e-book version with Indiana University Press.
